

TEST RIG

WLL 30 TONNES

APMS Solutions and On-Site Service

Container Lift Point Load Testing

APMS provide on-site Container Lift Point Load Testing, with the aid of a unique Test Rig designed and built by APMS.

An APMS service team can arrive at your site with a fully portable Test Rig, reference load cell and associated equipment. Carry out pull testing of lift points, which is supported by a detailed report for each container.

No requirement for cranes / rigging / tie-down or anchoring of container.
