

GETS THE JOB DONE RIGHT
Global Leading Construction Machinery Manufacturer

Crawler Crane 55 - 650 T

The brand-new hydraulic pilot control technology can realize arbitrary composition of actions.

- Multiple safety protection of comprehensive video surveillance plus sound-light alarms;
- Overall upgraded controllability, with the working speed, movement smoothness and micro-mobility perfectly integrated.
- The humanized intelligent design can fully meet the ergonomic demands.
- Mature and reliable supporting assembly configuration can achieve high cost performance.

ZOOMLION

Off-Road Tire Crane 35 - 100 T

Full-wheel drive, large ground clearance and strong off-road performance. It is suitable for off-road travel

- Full-extension, half-extension and full-withdrawing leg operation, no-leg operation and driving with load
- Full-wheel steering, short wheel base, small turning radius, strong maneuverability; it is applicable to driving and operation in a narrow field
- The cab and operating room are integrated into one. Comprehensive lifting operation increases lifting capacity of the front.
- The utilization of network node control technique can realize intelligent fault diagnosis, facilitate the troubleshooting for the electrical system of the complete vehicle and improve the maintainability of the electrical system.

Truck Crane 16 - 200 T

- A truck crane featuring full circle swinging, 7-section telescopic luffing jib and electro-hydraulic proportional control;
- Six-axle all terrain crane chassis using upgraded technology, with greater load bearing capacity and higher mobility.
- Upgraded action control, ideal balance between operating speed, smoothness, and inching performance;
- Upgraded active and passive safety system ensures the safety of personnel, crane during construction.
